EXECUTIVE SUMMARY

A market in decline

Shifts in the all-important kid demographic

Why eat cookies?

Why not eat cookies?

Companies fight back...

...Or fall down

The silver lining

Kraft and Kellogg still lead despite losses

Retail shares remain stable

Got cookies?

The future: not necessarily brighter

MARKET DRIVERS

The kid factor

Figure 1: U.S. population projections, by age group, 1998-2008

Number of households with children

Figure 2: Projected growth in number of households with children, 1998-2008

The U.S. obesity epidemic

Figure 3: Prevalence of obesity among adults aged 20 years and over, 1997-2003

Graph 1: Percentage of overweight/obese adults in the U.S., 1999-2003

Graph 2: Number of obesity-related media reports, 1999-2003

Children and obesity

Figure 4: Incidence of being overweight, 6-19 year olds, 1976-2000

Graph 3: Percentage of overweight children and young adults, 1976-2000

Actions and reactions

The low-carb revolution

Addressing diabetes

(Almost) everyone loves cookies

Convenience

Fun for kids

Indulgence for adults

Cross-over products

MARKET SIZE & TRENDS

Figure 70: Low-fat/fat-free products used by teens, January-September 2003

Figure 71: Low-fat/fat-free products used by teens, by gender, January-September 2003

Children and cookies

Children's cookie consumption

Figure 72: Child consumption of cookies, January-September 2003

Frequency of cookie consumption among children

Figure 73: Frequency of child cookie consumption, January-September 2003

Figure 74: Frequency of child cookie consumption, by race/ethnicity, January-September 2003

Children's influence on cookie purchases

Figure 75: Child influence on household cookie selection, January-September 2003

Figure 76: Child influence on household cookie selection, by age, January-September 2003

Figure 77: Child influence on household cookie selection, by race/ethnicity, January-September 2003

Children's attitudes towards sweets

Figure 78: Child attitudes towards eating sweets, January-September 2003

Figure 79: Child attitudes towards eating sweets, by race/ethnicity, January-September 2003

Cookies at school

Figure 80: Availability of cookies at school, January-September 2003

Figure 81: Availability of cookies at school, by race/ethnicity, January-September 2003

Summary

The presence of children is key to the market

Opportunities for growth with products that appeal to adults

Differences in consumption by gender

Differences in consumption by race/ethnicity

Indication that consumption levels might be declining

FUTURE & FORECAST

FUTURE TRENDS

Continuing demographic changes

Cookie sales still driven by kids

Figure 82: Projected U.S. child population, 1999-2010

Figure 83: U.S. population by age as percentage of total population, 1999-2010

More products for adults

The growing Hispanic market

Figure 84: projected growth of U.S. racial and ethnic groups, 2004-2010

Low-carb saga continues

Obesity and other health concerns

Labeling requirements may raise additional concerns

More organic and all natural products will appear on the market

Rising cost of ingredients

MARKET FORECAST

Overview

Figure 85: Forecast of U.S. retail sales of cookies, at current and constant prices, 2004-2009
